

KAZMI ENGINEERING

LEADERS IN LPG ENGINEERING SERVICES PAKISTAN

1

WHAT IS LPG

- ▶ **Liquefied petroleum gas (LPG)** is a different chemical compound to natural gas even though they are both hydrocarbons.
- ▶ **LPG** consists of propane and/or butane.
- ▶ **LPG (Liquefied Petroleum Gas)** is a flammable mixture of hydrocarbon gases, usually propane and butane, used as a fuel source worldwide. Predominantly used for cooking, heating and automobiles.

MESSAGE OF THE CHAIRMAN/CEO SYED ABBAS KAZMI

3

▶ The first allocation of LPG quota was made by Ministry of Petroleum to Foundation Gas & Burshane Pak Ltd during 1972-73 from Dhullian Oil Field. As the LPG business expanded and political regime issued more Licenses to the companies, the safety violations were made by some people and the importance of rules and regulations on LPG were under threat. There was a dire need of technical expertise for plant installation jobs and I had gained a great experience in the field so I took initiative to form Kazmi Engineering during 1995 with an aim to serve the nation in LPG sector with proper knowledge and experience.

▶ Kazmi Engineering got a good reputation working through ethical means, strict on safety measures and selection of right products. Now by the grace of almighty Allah Kazmi Engineering is a popular firm among all marketing companies providing services in all of the provinces of the country through establishing its offices in all regions.

▶ The marketing companies rely on experience of the firm and I feel proud that I have brought a good change for which my team is working hard in serving the nation in energy sector.

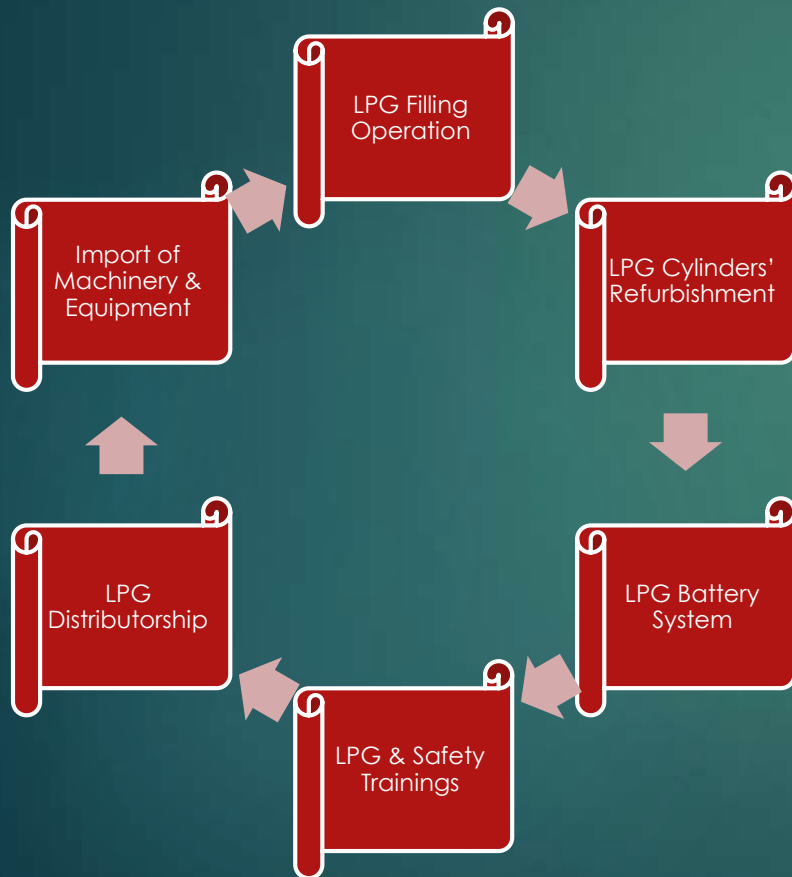

▶ I am satisfied with growth of the firm and pray for its success in future with a hope that it will continue working on ethical grounds with hard work, commitment, loyalty and care. I'm doing what I think I was put on this earth to do. And I'm really grateful to have something that I'm passionate about and that I think is profoundly important.
